Holiday Home Work

Grade - VII

Dear Students,

Summer Vacation is here and it is time for some fun games & family outings. Though this break is necessary to break the monotony of daily routine, we must do certain activities to freshen up our minds & keep it active & alert. This will ensure that when we come back to school we are rejuvenated.

Given below is set of activities (along with instructions) which we expect you to do & these will be added to your F.A. score. **Submit assignments as per the instructions in each subject. All work has been explained by the teacher in the class.**

English:-

- Read the English news paper every day for one week and pick out 10 new English words. Write the word in your English copy along with its meaning and its opposite. Also make a sentence with each new word. (in H.W. Copy)
- Write a movie review on an A4 Size Sheet on any movie that you watch in the holidays (in H.W. Copy). Prepare a poster on the movie and paste it in your scrap book.

Science:-

- Create your own organic garden (instructions given on next page)
- Prepare a plan & write the method on how water harvesting can be done in your house (along with an illustration) in your notebook.

Social Science:-

- Cut out a display advertisement and paste in your notebook. Write all the positive points of the advertisement and why it appealed to you.
- UNESCO has selected several monuments as World Heritage Sites to protect and preserve cultural sites all over the world. There are many such heritage sites in India. Select any 10 and find their locations. Make a table, listing these names. Your table should have four heads: name of site, name of location, latitude, and longitude. Use your atlas to find the locations. Now, list the latitude and longitude of each site in your table.

Instructions to create your Organic Garden

Take a wooden box of about 1.5 to 2 feet deep, 3-4 feet long and 2-3 feet wide. Clean it and make 5-6 small holes at the bottom for the water to drain out. Take some fresh garden soil but make sure it does not have any artificial manure or pesticides mixed in it.

You can mix some cow dung or natural compost in the soil. Mix the soil thoroughly. Cover the holes in the box with small wire meshes or very small pebbles so that the sand or soil does not get in and block the drainage holes. Put the mixed soil in the box.

Select some flower/plant seedlings or seeds and plant them in the soil. Keep some distance between each seed, as the plants will need space to grow.

For your project you should select plants or seeds that will flower or give fruit during the time of your submission. Check at the local gardening store to select the right seeds of fruits and vegetables.

Take care to water your seeds and make sure they do not get too much sun or rain. Keep checking that the drainage is not blocked or too much water in the soil will destroy the seeds. When required you can add more manure and fertilizers to the soil but make sure they are natural and do not have any harmful chemicals.

When submitting your project label each fruit and vegetable and also make a display chart of the manures and fertilizers used with information about what it is made of.

Maths:-

a) Solve the riddles given below:-

Read the riddles, then draw the shapes it describes.

- | | |
|--|---|
| 1) I have 3 sides and 3 corners. One of my corners is at the top. | 2) I have no corners. One half of me is like the other half. |
| 3) I have 4 corners and 4 sides. You can draw me by joining 2 triangles. | 4) I have 5 sides and 5 corners. Draw a square and a triangle together. |
| 5) I am not a square, but I have 4 sides and 4 corners. | 6) I have 4 sides and 4 corners. My 2 opposite sides are slanted. |

b) Note down the Day, Date & Year of your birthday. Find out when it will fall on 2017, 2018 & 2019. Show the result in a tabular form in your notebook. Explain what pattern it will take.

Date	Day	Year	
------	-----	------	--

(Do the homework in maths notebook)

Hindi:- विभिन्न देशों के झंडों के चित्र एकत्रित कर उन्हें स्क्रेप बुक में चिपकाएँ।

“वन और हमारा जीवन” विषय पर 100 – 125 शब्दों में अपनी उत्तर पुस्तिका में अनुच्छेद लिखिए।

Points to remember:-

1. Read books regularly; Speak in English at home; Always be polite and courteous.
2. Keep a pot of water for birds and take care of it.
3. Homework also available on school website.

SAVE WATER

HAPPY HOLIDAYS!
